Present Status of Oil Pool Deficit

*46 DR. V. LAKSHMI PRASAD: Will the Minister of PETROLEUM AND NATURAL GAS be pleased to state:

(a) the country's Oil Pool deficit at present;

(b) the likely deficit in 1997-98; and

(c) the effect of rising Pool deficit on public sector undertakings in oil sector?

THE MINISTER OF PETROLEUM AND NATURAL GAS (SHRI JANESHWAR MISHRA): (a) The cumulative oil companies' outstandings are estimated to be around Rs. 15,500 crores as on 31.3.97.

(b) Based ont the estimates of quantities and rates of imported crude oil and petroleum products, quantities of indigenous crude processed etc. as per OEB, the cumulative oil companies' outstandings are estimated to the level of Rs. 24,500 crores as on 31.3.98.

(c) The mounting outstandings have resulted in oil companies experiencing severe cash crunch necessitating them to resort to huge borowings which were » around Rs. 22,000 crores as on 31.3.97. As most of the oil companies have already exhausted their working capital ,_ limits, additional borrowings of the oil sector will have to be necessarily from the market sources on higher interest rates which would adversely affect their profitability. The stand alone refineries *∴e.* MRL, CRL etc. have reported that their operations will be adversely affected due to liquidity crisis. It is also going to have an adverse impact on implementation of several critical projects undertaken by the oil industry to meet future demand of petroleum products.
